

Luis Alberto Huaney Lino

Fullstack Engineer | TypeScript | React | Node.js · Express | PostgreSQL | REST · Microservices | Docker | 3+ years exp.

Peru (remote) • [Online Portfolio](#) • +51 946 587 273 • martinlinohuaney@gmail.com

Fullstack Engineer with 3+ years developing high-quality, responsive web applications with a focus on TypeScript. I build React front ends (function components, hooks, tests) and design server-side REST APIs, data models and business logic with Node.js/Express over PostgreSQL. I own features end-to-end across client, server and database, write reusable modular code, and thrive in a collaborative, remote-first environment with code reviews and CI/CD.

PROFESSIONAL EXPERIENCE

Caja Arequipa

Fullstack Engineer

Lima, Peru

November 2025 – June 2026

- Owned full-stack features end-to-end (client, server and database) for the Caja 360 platform: React/Angular front end and REST back-end services, defining the solution architecture and coding standards.
- Designed and optimized the relational data layer (PostgreSQL/SQL Server/Oracle), ensuring transactional integrity and performance for critical processes.
- Automated deployment with Docker and CI/CD, reducing release times and configuration errors.

Reference: Ing. Alex Sifuentes · +51 946 614 367

Educa Perú

Fullstack Developer (React / Node)

Huaraz, Peru

April 2024 – November 2025

- Built responsive React + TypeScript interfaces (reusable function components, hooks, catalog/checkout) and Node/Laravel server-side APIs for an educational e-commerce platform.
- Designed REST APIs and data models over MySQL, integrating online payments; increased revenue 20–23% in the first 3 months.

Reference: Ing. Juan Laveriano · +51 908 750 706

OGTISE – UNASAM

Fullstack Developer (Spring Boot / Angular)

Huaraz, Peru

April 2025 – July 2025

Office of Information Technology, Systems, and Statistics

- Designed and developed the Resolution Management System (back-end services + Angular), reducing document lookup times by over 40%.

Eddecap

Web Developer

Huaraz, Peru

July 2022 – November 2023

- Developed and maintained the corporate website with HTML, CSS and JavaScript, applying performance and SEO best practices.

Reference: Ing. Gerardo Rodriguez · +51 943 104 662

EDUCATION

UNIVERSIDAD NACIONAL SANTIAGO ANTÚNEZ DE MAYOLO

Systems and Computer Engineering — Professional Degree (Titulado)

Huaraz, Peru

June 2020 – June 2026

UNIVERSIDAD NACIONAL SANTIAGO ANTÚNEZ DE MAYOLO

Systems and Computer Engineering — Bachelor's Degree

Huaraz, Peru

June 2020 – Oct. 2025

LANGUAGE CENTER – UNASAM

Basic English Course (A1)

Huaraz, Peru

June 2023 – June 2024

ADDITIONAL SKILLS

- TypeScript-focused full-stack: React (hooks, components, tests) + Node.js/Express REST APIs over PostgreSQL.

- End-to-end feature ownership across client, server, service and database.
- Remote-first collaboration: code reviews, Pull Requests, Git, CI/CD; Docker and containerization.
- Native Spanish; basic English (A1 certified), actively improving.

PROFESSIONAL DEVELOPMENT

2026

- Professional Degree in Systems and Computer Engineering — UNASAM | Apr. 2026
- Bachelor's Degree in Systems and Computer Engineering — UNASAM | Oct. 2025

2024

- Advanced Angular — Platzi | Aug. 2024
- JavaScript Advanced / Essentials — Cisco Networking Academy | Aug. 2024
- AWS Cloud Fundamentals — Amazon Web Services | Apr. 2024

SKILLS

Frontend:

- React + TypeScript — function components, hooks, reusable modules, unit tests; Angular (v11–v22).
- UI: Tailwind, Bootstrap, Material; responsive design and performance optimization.

Backend (Node.js / Express):

- Node.js with Express — server-side REST APIs, data models and business logic; also Java (Spring Boot), C# (.NET).
- RESTful APIs, microservices architecture, JWT/OAuth2 authentication, asynchronous programming.

Databases:

- PostgreSQL (schemas, queries, optimization); SQL Server, MySQL, Oracle; MongoDB and Redis (NoSQL/cache).

Testing & Quality:

- Unit and integration testing (Jasmine/Karma, JUnit, PHPUnit); code reviews and clean, maintainable code.

DevOps & Collaboration:

- Docker, Kubernetes (basic), CI/CD (GitHub Actions/GitLab CI); Git, Pull Requests, remote-first agile teamwork.

LANGUAGES

- Spanish — Native
- English — Basic (A1 certified), actively improving
